River Wye information page

We all want to see the health of the River Wye restored. The issues in the catchment are complex and will take the efforts of all stakeholders to make the improvements needed to restore the Wye.

Our new and improved River Wye website includes information on phosphorus, science and data, water resources, agriculture, regulation and more.

Included on the site are two videos about the English part of the Wye catchment, forming part of a series called 'Approaches to Regulating Agriculture'. The episodes explain how phosphorus plays a role within the catchment, the challenges that come with its use and how we are working in partnership to bring about the change needed to restore the Wye.

We would really value your feedback on the site, which can be submitted on the feedback section. To visit, feedback and subscribe to the latest news, you can visit the site by searching online for 'River Wye Engagement HQ', visiting the link below or by scanning the QR code. https://engageenvironmentagency.uk.engagementhq.com/hub-page/river-wye-water-quality-2
