## C. SPECIFICATION OF WORKS

1. Prior to cutting or trimming any area, the Contractor will ensure that the site is free of any significantly large stones and all paper, tins, bottles and other debris on the cutting area.
2. The Contractor will also inspect each site for areas of ground sinkage/potholes and areas of potential hazard and will inform the Council immediately of any such potential hazards.
3. The Contractor will at all times during the period of the Contract, ensure that all machines engaged in grass cutting operations are sharp and properly set, so as to produce a true and even cut. Any damage or areas of grass not cut to the approval of the Council from such lack of maintenance will be made good by the Contractor at his own expense and to the satisfaction of the Council.
4. The Contractor will at all times during the period of the Contract ensure that machines are properly guarded and maintained so as to present no danger to the operator, surrounding structures, vehicles or any person in the vicinity of operations. The Contractor will provide his staff with all safety equipment, (boots, reflective vests etc.), and will ensure that staff use these at all times they are engaged in work for the Council.
5. During the period of the Contract no growth regulators of any form will be applied to any area of turf without the Council sanctioning such an operation in writing, in advance.
6. All grass will be cut cleanly and evenly without damaging the existing surface and with sufficient overlap between passes of the cutter.
7. The Contractor will complete one area of grass cutting before moving onto the next, and immediately after cutting a scheduled area, the Contractor will ensure, where applicable, that all grass clippings and other arising's are cleared from all paved areas, playground equipment safety surfaces, paths and public footpaths, etc., by sweeping or using a blower.
8. Soft vegetative growth, such as clover will be deemed to be part of the Contract where it falls within large areas of grass.
9. Since it is not possible to predict accurately the precise number of mowing's which may be required on any site in any one year, the Schedule of Works includes a minimum number of mowing's, but the Contractor will be paid on a pro-rata basis for additional cuts, dependent upon the prevailing weather conditions throughout the growing season and at the discretion of the Council.
10. Mowing will take place on the full area of grass at the site, up to all path edges, fencing, play equipment, obstacles and any other boundaries.
11. Areas not cut to the satisfaction of the Council will be re-cut by the Contractor at the Contractor's own expense.
12. In very wet conditions all operations involving grass cutting shall cease until conditions allow operations to recommence without damaging the surface levels and contours of the ground or grass cutting "divots" from the machine rollers or cutters.
13. Should the Contractor cause damage to the surface or levels of the ground, or create divots during grass cutting operations, the Contractor will at his own expense reinstate such damage forthwith to the satisfaction of the Council.

14. Mowing will be carried out as close as possible to fixed obstructions. Moveable obstructions can be removed to facilitate cutting, and replaced before the Contractor leaves the site.
15. Mowing around obstructions including seats, trees, fence lines, posts, stones and kerbs and the like, and in the proximity of margins, will be undertaken using methods, tools and machines as appropriate to ensure neat edges to paths etc.
16. If used, strimmers must not be allowed to damage any trees, shrubs etc. or permanent or removable fittings; particular attention should be paid to the wooden supports for play equipment (e.g. Zip Wire).
17. All persons operating grass cutting machinery must be appropriately trained, and the Council reserves the right to ask the Contractor to provide adequate proof that his operators are well trained, conversant with Health and Safety legislation and competent in their operating methods.
18. All arising's from grass cutting, where collection is required, are to be removed from site and correctly disposed of.

NOTE: None of the sites have access to toilets or running water – so contractor will need to make their own arrangements for their staff welfare.
